ABOUT US

OilChem Industries Private Limited has been established in year 2020 with the aim of providing great product to the Automotive and Industrial society.

WHY US?

After doing the R&D of the today's Automotive and Industrial market our company has come up with a lubricant product under the title of Di-mol which are the best in quality, durability and affordable to the Indian consumers. These products are manufactured after many R&D's making it most compatible to the machinery, and the quality of the product is maintained by the mandatory tests performed by our experienced Engineers. The manufacturing of the products is done in the close and safe environment with high class automation equipment's. There's no compromise in product's quality.

An engine is not just an oil, It's more than just oil. It's liquid engineering. That's because while oil is an amazing natural resource, it's the way we refine, re-engineer and even synthesize oil that makes every Di-mol oil an essential addition to your motorcycle. So that you are relaxed for your motorcycle and enjoy your riding experience. We have customized the engine oil to meet the needs of your engine - and your riding style - Di-mol motorcycle oils fall into three broad categories: mineral, semi-synthetic and full synthetic. They also feature a wide range of different properties, formulations and viscosities to ensure that you always have the right type and grade of oil for your motorcycle, as recommended by the manufacturer. We ensure quality of our products so that you know that your bike motorcycle is in safe hands.

PASSENGER VEHICLE

When it's time for an oil change, knowing what motor oil to use is essential. The answer to that question gets more complex every day. The latest engines are getting smaller and more powerful all the time, and manufacturers are specifying complex full synthetic oils to cope with higher engine pressures and meet fuel efficiency targets. With upgradation in engine specifications and increase in numbers we have brought the engine oil which will meet the specification of your vehicle and churning out the maximum power and fuel efficiency out of it, which will provide you the utmost fun of driving your car. Since each car manufacturer comes different country with different specs. For example, if you're driving a muscle car or a European import, the manufacturer may well specify a full synthetic motor oil. Alternatively, if you're driving an older domestic vehicle, the manufacturer may recommend a conventional oil. However, even though that's the most economical option, a full synthetic will almost certainly look after your engine better. Knowing what engine oil to use at every oil change is essential. Your owner's manual will tell you which industry specification, type and grade of oil will meet your cars specifications.

CNG

PREMIUM MOTOR OIL

Di-mol™

With increase in fuel prices of diesel and petrol there has been major switch of fuel type from petrol/ diesel to CNG. With this change in Automotive sector, manufacturers have introduced CNG powered vehicles which are economical, powerful and environmental friendly. Hence for this CNG powered engine we have brought up with engine oils which are specifically formulated for them. This will lead to more smoother driving experience and increase in mileage as well. With the initiative of choosing an CNG powered vehicle we are providing clean and green environment for future.

HEAVY DUTY VEHICLE

With the advances of technology in modern diesel engines and ever tighter emission legislation, the role of engine oil has become extremely important. On top of that, for the owners and operators of all commercial vehicles efficiency and reliability are time and money. Every day you need to make sure that your vehicle performs well and no unexpected failure occurs. Minimizing unscheduled downtime is key to keeping your business running smoothly and delivering on your promise. But for the heart of the vehicle that is your engine needs to be fit and powerful to carry the heavy loads on the twisty and up hill roads, long highways, etc and to maintain this fitness you need put correct engine oil in your vehicle according to owner's manual specified by manufacturer. In response to those needs Di-mol has engineered a product range of advanced diesel engine oils that can reduce frictional resistance and protect against corrosion and wear, assist in sealing, contribute to cooling the engine, and facilitate the suspension of harmful combustion by-products. Whatever your vehicle's requirements you can easily find the right product that will help your engine perform at its best.
